

# COMBINING INTEGERS WAR!

## War Partner Activity:

### Objective:

The goal is to collect the most cards by correctly summing the values of the cards drawn.

### Setup:

- Each pair receives a standard deck of cards.
- Red cards represent negative integers; black cards represent positive integers.
- Card values:
  - Ace = 1
  - Number cards (2-10) are valued as shown.
  - Jack = 11, Queen = 12, King = 13.

### How to Play:

1. One player deals all the cards evenly between the two players.
2. Both players flip their top card at the same time.
3. Each player calculates the sum of the two cards (remember: red cards are negative, black cards are positive!).
4. The player who correctly announces the sum first wins both cards.
5. Continue flipping and calculating sums until all the cards have been played.
6. The player with the most cards at the end wins the game!

### Optional Rules:

- Continue playing until one player collects all the cards and becomes the ultimate winner!
